

To the Utah investment community,

The Park City Angels are pleased to announce that our members have made an investment in [Eradivir](#). Eradivir has developed biotechnology with the potential to cure some of the world's most pervasive diseases.

We are excited about this opportunity to help Eradivir grow. As evidenced by this investment, we seek to continue promoting best practices in order to reduce risk in early-stage investments for the benefit of entrepreneurs, investors, and the community. We also make our considerable expertise across numerous industries available to our entrepreneurs, as their needs warrant.

About Park City Angels - We are a group of accredited investors located in Park City looking to invest in promising opportunities that can produce significant shareholder return. As Utah's most active Angel network, we have made over 1200 investments totaling over \$75M since 2008. For entrepreneurs seeking funding, please direct them to [info@parkcityangels.com](mailto:info@parkcityangels.com).

We welcome new members throughout the year. For any questions about becoming a Park City Angel, please reach out to us at [membership@parkcityangels.com](mailto:membership@parkcityangels.com).

Sincerely,

Park City Angels
