

To the Utah investment community,

The Park City Angels are pleased to announce that our members have made an additional investment in [Pale Blue Earth](#). Pale Blue Earth is working to see the world move beyond single use batteries. By bringing the convenience of on-product, fast USB charging and the benefits of lithium ion chemistry to batteries, they are aiming to see single use batteries go the way of the incandescent lightbulb and the single use plastic straw.

We are excited about this opportunity to help Pale Blue Earth grow. As evidenced by this investment, we seek to continue promoting best practices in order to reduce risk in early-stage investments for the benefit of entrepreneurs, investors, and the community. We also make our considerable expertise across numerous industries available to our entrepreneurs, as their needs warrant.

About Park City Angels - We are a group of accredited investors located in Park City looking to invest in promising opportunities that can produce significant shareholder return. As Utah's most active Angel network, we have made over 1200 investments totaling over \$75M since 2008. For entrepreneurs seeking funding, please direct them to info@parkcityangels.com.

We welcome new members throughout the year. For any questions about becoming a Park City Angel, please reach out to us at membership@parkcityangels.com.

Sincerely,

Park City Angels
